

Contact finger strips are available in a wide range of profiles, a choice of two materials and six different finishes. Contact finger strips can be fixed in place by either a conductive self-adhesive strip, clip on mounting or soldered in place.

P&P Technology are always happy to provide guidance on the best product for your application.

### CFS Shielding - Contact Finger Strips

#### Advantages -

- Excellent service life
- Good EMC performance
- Choice of materials
- Choice of plating to suit most applications
- Choice of fixing methods
- Low closing force
- Do not take compression set
